

# YASH LANDE

Junior Data Engineer (Fresher) | SQL, ETL, Data Validation, Pipeline Support

Pune | 7498733940 | yashlande730@gmail.com | linkedin.com/in/yashlande09 | github.com/Yashlande09

## PROFESSIONAL SUMMARY

B.Tech (Computer Science & Engineering, 2026) graduate with a strong foundation in SQL, ETL/ELT concepts, and data engineering fundamentals from academic coursework and professional training. Hands-on experience building data pipelines, validating data quality, and troubleshooting data issues. Comfortable with monitoring, documentation, and first-level incident management. Reliable, detail-oriented team player eager to support production data systems and grow into the data engineering field.

## TECHNICAL SKILLS

**Core Data Engineering:** SQL (PostgreSQL, MySQL), ETL/ELT Concepts, Data Pipeline Monitoring, Data Validation & Quality Checks, Source-to-Target Reconciliation

**Programming & Scripting:** Python (Pandas, NumPy) for data automation and basic scripting

**Data Processing:** Data Cleaning & Transformation, Error Handling, Log Analysis, Incident Troubleshooting

**Production Support:** Monitoring & Alerting, Incident Documentation, First-Level Troubleshooting, Operational Reporting

**Tools & Platforms:** Git & GitHub, Jupyter Notebook, SQL IDEs, Power BI/Power Query

**Additional:** Cloud fundamentals awareness, Documentation & Runbook creation, Agile practices

## RELEVANT PROJECTS

**Data Pipeline & Validation Project — Credit Risk** Sep 2025 – Dec 2025

SQL, Python, Data Validation

- Built and monitored an end-to-end ETL pipeline: extracted raw loan/customer data, performed source validation, transformed and cleaned data, and loaded into target system.
- Implemented data quality checks, caught data mismatches and discrepancies, and performed source-to-target reconciliation to ensure accuracy.
- Documented the pipeline workflow, created runbooks for data refresh operations, and supported troubleshooting of failed jobs.

**Stock Market Data Pipeline & Monitoring** Apr 2025 – Jul 2025

SQL, Python, Data Monitoring

- Designed and monitored a data pipeline for extracting, validating, and loading 2 years of historical stock price data from multiple sources.
- Built validation queries to check for missing data, outliers, and data quality issues; created alerts for pipeline failures.
- Performed root cause analysis on failed loads, collected logs and error messages, and documented findings for escalation.

## PROFESSIONAL TRAINING

**Data Science Trainee** | QSpiders, Wakad, Pune Feb 2026 – Aug 2026

- Completed hands-on training in SQL, Python, Data Preprocessing, and ETL fundamentals with emphasis on data quality and production-ready pipelines.
- Built data pipeline projects covering extraction, validation, transformation, and loading with error handling and monitoring.
- Practiced incident management, documentation, and troubleshooting real-world data issues using logs and monitoring tools.

## EDUCATION

**Bachelor of Technology (B.Tech) – Computer Science & Engineering** 2022 – 2026

Rashtrasant Tukadoji Maharaj Nagpur University | CGPA: 7.64

Higher Secondary Certificate (HSC) – Science, Gondwana University | 67.86% | 2021 – 2022

Secondary School Certificate (SSC), Gondwana University | 81.20% | 2019 – 2020

## CERTIFICATIONS

- IBM: Python for Data Science
- Oracle: Data Science Professional
- Google Analytics Certification
- AWS: Fundamentals of Machine Learning
- Oracle: Generative AI Professional
- SQL Certification (Udemy)

## ACHIEVEMENT

- Naukri Campus Young Turks Award — 97.35th percentile
